ASA ABSTRACTS

A-677 Room 220–222, 10/17/2000 3:30 PM - 5:00 PM (PD)
Changes in Cerebral Microcirculation after the Release of Aortic Clamp in Rabbits Matayoshi Uchida, MD; Hiroki Iida, MD; Mami Iida, MD; Shoji Dohi, MD, Department of Anesthesiology, Gifu University School of Medicine, Gifu City, Gifu, Japan. Since cerebral pial vasoconstriction following aortic declamping is attenuated by serotonin, it could be induced by TXA2.

Experimental Circulation: Preconditioning & Potassium Channels

A-678 Room 309, 10/18/2000 2:00 PM - 3:30 PM (PD)
Effect of Isoflurane on PKC Activated KATP Channel: Implications for Anesthetic Preconditioning Kazuhiko Fujimoto, MD, PhD; Zeljko J. Bosnjak, PhD; Wei-Meng Kuok, PhD, Anesthesiology, Medical College of Wisconsin, Milwaukee, WI, United States. Isoflurane modulates PKC activated KATP channel via an intracellular mechanism.

A-679 Room 309, 10/18/2000 2:00 PM - 3:30 PM (PD)
Scvoflurane Pre-treatment Improves Function and Reduces Formation of Peroxynitrite after Global Ischemia in Isolated Hearts Enis Nosalija, MD, Jianzhang An, MD; Amanda Camara, PhD; Srinivasan G. Varadarajun, MD,PhD; David F. Stove, MD,PhD, Anesthesiology, Medical College of Wisconsin, Milwaukee, WI, United States. Scvoflurane pre-treatment improves function and reduces peroxynitrite after ischemia.

A-680 Room 309, 10/18/2000 2:00 PM - 3:30 PM (PD)
Diabetes and Acute Hyperglycemia Abolish Mitochondrial KATP Channel-Induced Cardioprotection In Vitro Judy R. Kersten, MD; Wolfgang G. Toller, MD; Paul S. Pagel, MD,PhD; David C. Wartli, MD, PhD, Department of Anesthesiology, Medical College of Wisconsin, Milwaukee, WI, United States. Diazoxide does not reduce myocardial infarct size in diabetic or hyperglycemic dogs.

A-681 Room 309, 10/18/2000 2:00 PM - 3:30 PM (PD)
Role of Mitochondrial KATP and Stretch-Activated Channels in Isoflurane-Induced Preconditioning Vincent Pirion, MD, PhD; Pascal Chiari, MD; Jean Neudecker, MD; Michel Orize, MD, PhD; Jean-Jacques Isbot, MD, PhD, EA 1896, Anesthésie-Reanimation, Hospital Cardiovasculaire Louis Pradel, Lyon, France. We showed that 5-hydroxydecanoate and gadolinium antagonized isoflurane-induced preconditioning.

A-682 Room 309, 10/18/2000 2:00 PM - 3:30 PM (PD)
Chronic Intermittent Consumption of Low Doses of Ethanol Reduces Experimental Myocardial Infarct Size by KATP Channel Activation in Dogs Paul S. Pagel, MD, PhD; Wolfgang G. Toller, MD; Eric R. Gross, BS; Judy R. Kersten, MD; David C. Wartli, MD, PhD, Anesthesiology, Medicine, and Pharmacology, Medical College of Wisconsin, Milwaukee, WI, United States. Ethanol reduces infarct size by activating KATP channels.

A-683 Room 309, 10/18/2000 2:00 PM - 3:30 PM (PD)
Isoflurane Sensitizes the Cloned Pancreatic KATP Channel to Diazoxide Anna Stadnicka, PhD; Wei-Meng Kuok, PhD; Zeljko J. Bosnjak, PhD, Anesthesiology, Medical College of Wisconsin, Milwau-kee, WI, United States. Isoflurane inhibits current through cloned pancreatic KATP channels expressed transiently in HEK293 cells, and sensitizes the channel to diazoxide.

A-684 Room 309, 10/18/2000 2:00 PM - 3:30 PM (PD)
Remote Preconditioning Improves Lung Function after Repeated Coronary Artery Occlusion and Reperfusion Zhongyan Xia, MD; Paul Herijgers, MD, PhD; P. Wouters, MD, PhD; T. Nisibida, MD, PhD; V. Leuvenois, Center for Experimental Surgery and Anesthesiology, Catholic University of Leuven, Leuven, Leuven, Belgium. Remote preconditioning improves lung gas exchange after repeated coronary artery occlusion and reperfusion.

A-685 Room 309, 10/18/2000 2:00 PM - 3:30 PM (PD)
